

Parish and Community Engagement :- Event 3

The 2022 Autumn event

This was held on 9th October 2-4pm and Tuesday 11th October 10-12 pm in the Portacabin on the Recreation Ground. It was widely advertised and well-organised, this time to introduce residents to the Landscape Survey, another of several documents used for evidence in the preparation of the Neighbourhood Plan. A large scale map was exhibited and photographs of views selected to be the most illustrative of the nature of the parish were also exhibited. A photograph competition for the best view in the parish was offered as an enticement. Disappointingly less than twenty residents attended and very few photographs were entered in the competition. Discussion focussed mainly on the necessity of affordable homes. However, after vigorous discussion, a better understanding of the need for the preservation of the best views of the landscape in the parish alongside any future development through a successful Neighbourhood Plan was achieved.
