

COMMENTS BY ATTENDEES AT THE REGULATION 14 EVENT.

1. Re 2c

Is the land between Carlton and Priory Place opposite the church door included in 'Green Spaces' All the land in this particular area is of historic importance to the church and village. These fields also add to the character and rural charm of the area.

2. Many thanks to everyone who has worked so hard, and for so long to put this plan together. You have done everything you can to put the best interests of the village to the forefront.

I agree with your proposals and hope this goes some way to protecting the village and its immediate surroundings. There has been so much development over recent years, not all in keeping with the surrounding area,...

Hopefully the plan will be adopted.

3. We worry about the potential strain on the local infrastructure (roads, schools, healthcare facilities) which may not be equipped to handle such an increase in the population.

We are also concerned about the loss of green spaces, changes to the village character and impact on local wildlife.

This neighbourhood plan will address these concerns.

4. Thanks to all who have worked so hard to get this NP document produced.

The emphasis on trying to retain the rural nature and historic hamlet is very welcome

With 200 new builds already in progress and application for another 72 it feels as if the village is changing beyond redemption.

I agree totally with all the proposals and trust it will be passed by UDC to protect this area from further urbanisation.
